

Demonstration of Proposed Features

Date	2 July 2026
Team ID	XXXXXX
Project Name	Emotion Detection & Learning Support Engine
Maximum Marks	1 Mark

Demonstration of Proposed Features:

S. No	Feature Name	Description	Status	Demonstrated	Remarks
1	User Input Interface	Allows users to enter text describing their feelings or learning concerns.	Implemented	Yes	Successfully accepts user input.
2	Text Preprocessing	Cleans, encodes, preprocesses the input text before emotion prediction.	Implemented	Yes	Improves prediction accuracy.
3	Emotion Detection Model	User a trained BERT-based model to identify emotions from text.	Implemented	Yes	Provides accurate emotion classification
4	Personalized Learning Support	Generates learning suggestions and motivational guidance based on the detected emotion.	Implemented	Yes	Delivers personalized recommendations.
5	Web Application	Integrated the trained model into a Streamlit web application with an easy-to-use interface.	Implemented	Yes	Successfully tested and deployed locally.
6	Result Display	Displays the detected emotion along with confidence score and learning support recommendations.	Implemented	Yes	Provides clear and user-friendly output.

Feature Implementation Summary:

Metric	Value
Total Features Proposed	6
Total Features Implemented	6
Total Features Demonstrated	6
